

CEPSA MOTO GRASA CADENAS

Description

Lubricant grease formulated with polymers in long-life mineral oil, with adherence and extreme pressure additives. The product is packaged in an aerosol.

Applications

- Product specially prepared for external lubrication of motorcycle transmission chains.
- Shake the container and spray directly onto the element to be lubricated.

Product performance

- Great adherence.
- Extends drive chain life.
- Good antirust and anticorrosion protection.
- Superb penetration capability.

Typical Characteristics

CHARACTERISTIC	UNITS	METHOD	CEPSA MOTO GRASA CADENAS
Appearance		Visual	Semi-fluid liquid
Density at 15 °C	g/ml	ASTM D-4052	0.89
Viscosity at 20 °C	cP	-	7000
Flash point	°C	ASTM D-92	> 260
Corrosion test	hours	ASTM B-117	> 6
E.P. 4-Balls. Weld load (10 s / 1800 rpm)	Kg	ASTM D-2596	>160 Kg

Environment, Health and Safety

A Material Safety Data Sheet providing information on product hazards, handling precautions, first aid measures, and relevant environmental data is available for this product as per applicable legislation.
